

SUN GROVE FOODS

S U N G R O V E F O O D S

About Us

Conveniently located in Northern New Jersey, Sun Grove Foods is a major importer, bottler, and wholesaler of olive oil from the principal production areas around the Mediterranean.

The company was established with the strategic goal to source and introduce the highest quality and most comprehensive range of olive oils available to the North American market.

Whether it's premium, award-winning brands or bulk, every oil is imported directly from its source from trusted, well-established, ISO Certified producers with full traceability.

With the advantage of operating its own modern storage and production facility in the Northeastern United States, Sun Grove Foods maintains the unique capability to deliver a large range of high quality products throughout the country.

Sun Grove Foods implements a rigorous quality control system in the production process. In addition to being SQF Certified, every product is thoroughly tested and guaranteed to meet strict IOC quality standards and even higher internal standards for freshness and taste.

Greek Olive Oil

During the classical era in Athens, the olive tree was considered a present to their city from the wise and brave goddess, Athena, and Greeks would carry olive branches during ancient rituals as a symbol of purity and freshness. According to Aristotle, whoever destroyed or eradicated an olive tree was condemned to death.

Today the country holds the position as the 3rd largest producer of olive oil in the world, producing around 15% of the total world production. In fact, what makes Greece so unique when compared with other producing countries is that 70-80% of all olive oil produced in the country qualifies as premium-quality extra virgin.

Greek olive oils are highly regarded for their attractive, well-balanced flavor profiles of medium to intense fruitiness. Pleasant aromas of freshly cut grass and artichoke are common, along with a sweet almond flavor and mildly pungent, peppery finish.

Crete

It is widely believed that the first-ever cultivation of olive trees took place on the Greek island of Crete where archaeological evidence suggests that olives were being grown as long ago as 4500 BC.

Kalamata

The Kalamata area in the Southern Peloponnese region of Greece is known for its superior quality olive oil.

A R I A

Aria

This quality olive oil is crushed from olives grown in the sun-rich soil and sea-salt air on the island of Crete. Here the olives are nurtured to perfection and upon reaching their optimal ripeness, they are harvested and with uncompromising integrity, transformed into an oil of exceptionally high quality. By combining centuries-old harvesting traditions with the latest in production technology, Aralia ensures the oil that is extracted retains the special qualities that give Aria its distinctive flavor, aroma and low acidity. A favorite among the world's most discerning chefs, this extra virgin olive oil from Western Crete is pressed from estate-grown Koroneiki olives that are pressed within hours of being picked from the tree. A NASFT winner for "Outstanding Olive Oil", this exceptional oil is characterized by a unique bouquet and taste that are truly unparalleled.

ENTÉLIA

Entelia

Named after the Greek word **εντέλεια**, meaning whole and absolute perfection, Entelia is a product of love and passion, produced on small family-owned farms at the foothills of the picturesque White Mountains of Western Crete. The olive trees belong to the Koroneiki variety and are farmed with great skill, care and attention by their owners. The precise moment of ripeness is carefully determined, harvesting is done by hand and the olives are transported and crushed at the mill within the crucial short hours after picking. The result of this tender loving care and attention is a cold-extracted, amazingly flavorful, aromatic fruit juice that is Entelia extra virgin olive oil.

Italian Olive Oil

Olive trees are an iconic and integral part of the Italian landscape, and no other country is more highly associated with olive oil, from the romantic images of olive groves in Tuscany, to the oil's dominant influence in nearly every Italian recipe, from pasta, fish and vegetables to cake.

Italy is the second largest producer of olive oil, contributing about 20% of the total world production each year. Southern regions of Italy like Puglia and Sicily produce the largest quantities of olive oil in the country, however, premium quality extra virgin olive oils are produced all over Italy. With over 500 varieties of olives on record, Italy boasts a wide range of olive oils with a diverse set of flavor profiles. Each region cultivates olive varieties specific to its land, fostering an olive oil culture unique to Italy. Notable regional varieties include Nocellara from Sicily, Coratina and Peranzana from Puglia, Moraiolo and Frantoio from Tuscany, and Itrana from Lazio.

Premium Italian extra virgin olive oil is almost exclusively produced by family-owned estate operations who often own their own frantoio (crushing mill) and oversee every step of the process, from tree to bottle. It is these small dedicated producers who account for much of Italian olive oil's excellence.

Sicily

The sun-kissed island of Sicily produces some of the most desired olive oils in the world.

Puglia

The hilly coastal terrain of Puglia is the source of some of the most iconic Italian olive oils.

L A C I V E T T A

La Civetta

This exquisite olive oil is cold-extracted from hand-picked Nocellara olives grown in the Agrigento region of Western Sicily. The oil is medium-fruity, and perfectly balanced, imparting an aroma of ripe tomato, sweet almond and fresh herbs with a slight peppery finish.

Spanish Olive Oil

Although the country has a 4,000 year history of olive oil production, in the last 25 years Spanish olive oil has undergone a true revolution. While in the past the country held a strong reputation for sacrificing quality over quantity, Spanish producers today are making some of the world's best olive oils, utilizing the country's abundance of local olive varieties with their broad range of flavor profiles. It is no surprise that the many premium brands in Spain have seen a fair share of international awards in recent years.

Spain is by far the largest exporter of extra virgin olive oil in the world, producing nearly half of the world's production each year. Olive oil is produced in nearly every region in the country, but it is the South of Spain that is virtually defined by olives. In fact, the region of Andalusia alone produces around 60% of Spain's total output. In this picturesque region of Southern Spain, olive trees span the landscape as far as the eye can see and is a truly remarkable, breathtaking sight.

Spain cultivates hundreds of different varieties of olives, but the major varieties include Picual, Hojiblanca, Arbequina and Cornicabra.

Andalusia

Instantly recognized for its "sea of olives," Andalusia produces more olive oil than any other region in the world. Known especially for its three signature olive varieties, Arbequina, Hojiblanca and Picual, this region shows off how different olive cultivars can have their perfect place in the kitchen. The versatile Arbequina is mild and slightly sweet, perfect for baking and dressing fish. The fruity Hojiblanca excels as a dipping and finishing oil, while the more robust Picual pairs with grilled meat and is excellent for frying.

G R A N M O L I N O

Gran Molino

Two of the best Spanish olive varieties: Arbequina and Hojiblanca, are specially blended to produce an oil that is balanced, fragrant and complex with a consistent flavor profile. Produced by a co-op of small family-owned farms in the Puente Genil region of Southern Andalusia. This oil is medium-fruity with aromas of apple, tomato and ripe bananas with a sweet almond-like flavor and a slight peppery finish.

Ideally suited for all applications which require an aromatic, medium intensity extra virgin olive oil. Great for cooking, dressing, dipping and as a finishing oil.

Óleaves

For the Óleaves line of regional extra virgin olive oils we select the finest representative olive oil from the principal production regions of Spain, Italy, and Greece. Each oil has its own distinct flavor characteristics and is beloved by the locals who have been enjoying it in their local cuisine for centuries.

Farmers selected for the Óleaves brand must take special care of the land and their olive groves, harvest their olives at the optimum ripeness, and use top of the line production methods and milling practices including the cold extraction method.

In addition, each bottle of Óleaves states the specific region in which the olives were grown, the variety of olives from which the oil is extracted, and most importantly, the harvest date, so you always know the true freshness of the oil.

These strict quality standards, combined with transparency in labeling, ensures you are getting an olive oil true to its origin, produced with passion and care that is not only full in flavor, but also rich in healthy polyphenols.

All oils are Certified Kosher by OK Kosher and are naturally Gluten Free.

Bulk Olive Oil

Through our long-established relationships with many of the world's best and most renowned olive oil producers, we are able to source a large selection of single-variety, origin-specific oils such as Nocellara del Belice from Sicily; Peranzana and Coratina from Puglia; Picual, Hojiblanca and Arbequina from Spain; Koroneiki from Greece; Arbequina from California, as well as a wide array of flavored oils.

Each batch of bulk oil we receive is accompanied with a Certificate of Analysis and approved by our in-house certified tasting experts for quality, flavor and freshness. Additionally, we offer oils of certified origin under the European PDO and PGI schemes, as well as certified Kosher and organic extra virgin olive oil with European and FDA certification.

We operate out of our food safety certified packing facility in Northern New Jersey with Bulk size packaging ranging from 3 Liter to 1,000L. We also have private label options available.
