The test report refers exclusively to the tested samples. In case of sampling by the customer, the results refer to the sample as received. This document may only be reproduced in whole, unless under written authorization by our Laboratory.

The accreditation of the laboratory does not constitute endorsement of the product by the Accreditation Body. The test results can not be used for advertising purposes.

The expanded uncertainty is calculated with a probability level of 95%, coverage factor $k = 2$. Unless otherwise specified, in the evaluation of declaration of conformity/non conformity of results, the expanded uncertainty is not considered. The results of the present test report are not corrected by the recovery factor, unless otherwise expressed for each single parameter.

FL = Over Limit; U.M. = Measurement Units; U = Expanded uncertainty; R = Recovery; "<" = Below Limit of Quantification (LOQ)

(°) Information provided by the customer, therefore the laboratory declines any responsibility about it.

Note: If the transport temperature is not available, the temperature compliance refers to the check temperature.
